

Already have an IT Department? We play well with others. Let us enable your team to do more by adding resources, insight and efficiency while saving you money. Did you know...

The average company spends 70% of its IT budget on maintaining current operations and only 30% on new development.*

Why? Because managing IT is growing increasingly complex by the day and there's no amount of hiring that can crack that nut.

FunctionOne can help you flip that ratio and get more of your IT budget, and time, back where it belongs - on growth building business projects and initiatives. Why hire one new system engineer when you can have our entire team, network operations center, enterprise management tools and a CIO-level partner for less! Flip that HR headache and capital expenditure into a tax-friendly operational expense and make your IT department more efficient in the process.

Key Program Benefits

Scalable IT

Scale up OR **down** your IT as you need it, when you need it, where you need it – bet you can't do that with your payroll? Tap into our deep resource pool and apply the knowledge you need, where and when you need it, cost-effectively and efficiently.

Second Sight

Leverage our know-how from years of critical IT problem-solving in a myriad of environments to help maximize the benefits from your existing infrastructure and better plan for the future.

Save Money

Making another IT hire brings only one set of skills and experiences to bear, why limit yourself? We bring an entire team of seasoned engineers, a network operations center, world-class partners and an enterprise-level toolset to the table, and all for less than the cost of an entry-level network admin. Need we say more?

Increased Efficiency

With FunctionOne on your team we can drive efficiency on core projects by taking over the day to day monitoring, maintenance and end-user support tasks, freeing up your valuable engineers to focus on internal IT strategy and investments, thus improving your company value and competitive advantage.

Monkey Wrench

Let's face it – Enterprise Management Toolsets are expensive, and few investments reap the promised reward. We can save you that headache. Whether it's access to our **RemoteServices** platform giving your team valuable insight and access into the corporate network – or our **Raptor Business Continuity Server Solution** we've got the right tools for the job.

With our **Downstream IT Program** we've got you covered!
